

Alternative Three
The MOON Film produced by Anglia Television.
Supposed to be aired on April 1st, 1977.(April Fools)
Shown instead a few months later.
Gathered a cult following.
MARS

Alternative One - elimination of a huge portion of world population.
They are in the process of doing that. If they are not able to execute THE
PLAN some population thinning will be blamed on acts of terrorism.

Alternative Two - to build many underground bunkers, as large as small towns,
to protect the government in seclusion until the surface population thinning was
finished.

They have built over 200 such "underground cities". (Mt. Weather)

Alternative Three - to build a "transfer station" on the backside of the Moon,
build an underground base on Mars and remove a certain limited "Noah's Ark" cross
section of Earth's population, artists, scientists, engineers, writers, etc., to Mars as a
survival colony in the event of "catastrophy" on Earth.

They started this project in 1961 and may have accomplished most of this as
well.

VIEWERS TAKE NOTE
THERE IS SOME REASON TO BELIEVE A CONSPIRACY IS CAUSING REPAIRS TO
TAKE FAR LONGER THAN NECESSARY
THEY SAY THEY ARE WORKING ON THE SERVER, PUTTING IN NEW LOGIC
BOARD.
THE SERVER IS STILL SUPPOSEDLY MALFUNCTIONING AFTER THREE MONTHS
